NATURAL COLOR-CHANGE GEMSTONE

COLOR-CHANGE DIASPORE

We extract this stone naturally from our own bauxite mines in Muğla, have it cut by the finest cutters, and share it directly with you.

ORIGIN	Muğla, Türkiye
SPECIES	Natural diaspore, AlO(OH)
COLOR CHANGE	Green to pink and red

Natural color-change diaspore, cut and faceted.

MINED BY US / CUT BY THE BEST / SHARED DIRECT

ONE STONE. TWO LIGHTS.

Kiwi-green in daylight, pink to red under incandescent light. The same stone, photographed from the same position.

DAYLIGHT

INCANDESCENT

1

known source of gem-quality color-change diaspore: Muğla, Türkiye

6.5–7

Mohs hardness, comparable to peridot and tanzanite

2–3%

of the rough ends up as a finished, cut stone

FROM SOURCE TO YOU

MINED BY US. CUT BY THE BEST. SHARED DIRECT.

Every stone follows one short path: from our own quarries in Muğla, through the hands of expert cutters, straight to you. Always check the stone in your own light before purchase.

01 MINED

Natural rough from our own bauxite quarries in Muğla, Türkiye, the only known source of gem-quality color-change diaspore.

02 SELECTED

Rough is chosen for color change, clarity and the size of stone it can yield.

03 CUT BY THE BEST

Faceted by the finest cutters, because cut and carat size both shape the strength of the color change.

04 SHARED DIRECT

Photos and video in daylight and incandescent light, laboratory report on request, shipped from Türkiye straight to you.

Natural color-change diaspore from our mine in Muğla.
